Portfolio — GitHub — LinkedIn

Professional Summary

Software Engineer with nearly one year of hands-on experience in enterprise software development, ERP customization, and industrial monitoring systems. Experienced in backend development using Python, Django, Flask, frontend development using JavaScript, HTML, CSS, Bootstrap, react and Preact, along with PostgreSQL database management. Contributed to production ERP enhancements, Energy Monitoring Systems (EMS), Grafana dashboard development, computer vision dataset preparation using Label Studio, and client-site technical support. Passionate about building scalable software solutions and continuously learning modern technologies.

Education

Veer Surendra Sai University of Technology 2020 – 2024

Bachelor of Technology (B.Tech) in Production Engineering

CGPA: 6.64 / 10.00

Gayatri College of Science and Technology 2017 – 2019

Higher Secondary (12th)

Percentage: 65.50%

Melchhamunda High School 2017

Matriculation (10th)

Percentage: 75.00%

Certifications

- **Python Full Stack Development** – Internship Completion Certificate, Hailiot Technologies (May 26, 2025 – Aug 26, 2025)

Technical Skills

Programming Languages

Python, JavaScript, SQL, HTML, CSS

Frameworks

Django, Flask, Frappe Framework, Preact JS

Databases

PostgreSQL, SQLite

Tools & Technologies

Grafana, Git, GitHub, REST APIs, Bootstrap, MQTT, Label Studio, YOLOv8

Core Competencies

- Backend Development using Django and Flask
- Frontend Development using JavaScript, HTML, CSS, Bootstrap, react and Preact
- ERP Development and Production Bug Fixing
- PostgreSQL Database Design and SQL Query Development
- Grafana Dashboard Development
- Client-Site Technical Support
- Industrial Monitoring Systems

Professional Experience

Software Engineer

Sep 2025 – Present

Hailiot Technologies (Formerly Epsum Labs)

- Contributing to enterprise software development, ERP applications, and industrial monitoring systems using Python, Django, Flask, JavaScript, and PostgreSQL.
- Developing and maintaining backend modules and frontend components while resolving production issues and implementing feature enhancements.
- Working on database management using PostgreSQL and developing real-time monitoring dashboards using Grafana.
- Collaborating with the development team for software testing, deployment, troubleshooting, and production support.
- Participating in client-site visits for deployment, testing, and troubleshooting of industrial software issues.

Projects

Maithan ERP System

Technologies: Django, JavaScript, HTML, CSS, Bootstrap, PostgreSQL

- Worked on frontend and backend bug fixing for a production ERP application using JavaScript and Django.
- Implemented UI improvements and backend logic fixes based on project requirements.
- Worked with Django ORM and PostgreSQL for application data management and troubleshooting.
- Collaborated with the development team to identify, debug, and resolve production issues.

Energy Monitoring System (EMS)

Technologies: Flask, PostgreSQL, Grafana, JavaScript, HTML, CSS

- Developed real-time industrial monitoring dashboards using Grafana to visualize energy meter data.
- Developed backend services using Flask for fetching, processing, and managing industrial energy data.
- Designed and managed PostgreSQL databases for storing and handling monitoring data.
- Worked on both frontend dashboard development and backend development as part of the project team.
- Participated in client-site deployment and troubleshooting to resolve issues in the industrial environment.
- Supported project testing, implementation, and production activities to ensure reliable system operation.

Computer Vision – Smoke Fire Detection

Technologies: Python, YOLOv8, OpenCV, Label Studio

- Annotated, cleaned, and validated image datasets using Label Studio for YOLOv8-based Smoke and Fire detection.
- Trained and evaluated YOLOv8 models and optimized detection parameters to improve real-time detection reliability and reduce false detections.
- Developed a real-time video inference pipeline using Python and OpenCV, integrating RTSP-based IP camera streams for continuous Smoke and Fire monitoring.

Professional Highlights

- Hands-on experience across both frontend and backend development in real-world enterprise projects.
- Experience working with ERP systems, real-time industrial monitoring, databases, dashboards, and computer vision datasets.
- Participated in client-site technical support and troubleshooting in a live industrial environment.
